

Claims

What is claimed is:

- [c1] A lawn mower blade comprising:
 - a) a carrier;
 - b) a detachable cutting edge; and
 - c) an attachment mechanism that connects the cutting edge to the carrier where the attachment mechanism is accessible from the bottom of the carrier.
- [c2] A lawn mower blade as in claim 1 where the carrier is shaped to protect the attachment mechanism.
- [c3] A lawn mower blade as in claim 1 where the cutting edge is shaped to protect the attachment mechanism.
- [c4] A lawn mower blade as in claim 1 where the carrier and cutting edge are both shaped to protect the attachment mechanism.
- [c5] A lawn mower blade as in claim 1 where the attachment mechanism is above the cutting plane.
- [c6] A lawn mower blade comprising:
 - a) a carrier;
 - b) a detachable cutting edge; and
 - c) an attachment mechanism for attaching the cutting edge to the carrier where the attachment mechanism is protected by the shape of the carrier.

[c7] A lawn mower blade comprising:

- a) a carrier;
- b) a detachable cutting edge; and
- c) an attachment mechanism for attaching the cutting edge to the carrier where the attachment mechanism is protected by the shape of the cutting edge.

[c8] A lawn mower blade comprising:

- a) a carrier;
- b) a detachable cutting edge; and
- c) an attachment mechanism for attaching the cutting edge to the carrier where the attachment mechanism is protected by the shape of the blade assembly.

[c9] A lawn mower blade comprising:

- a) a carrier;
- b) a cutting mechanism; and
- c) means for mounting cutting mechanism to the carrier where the means for mounting can be accessed from the bottom of the carrier.

[c10] A lawn mower blade comprising:

- a) a carrier;
- b) a cutting mechanism; and
- c) means for mounting cutting mechanism to the carrier where the means for mounting is protected by the carrier.

[c11] A lawn mower blade comprising:

- a) a carrier;
- b) a cutting mechanism; and
- c) means for mounting cutting mechanism to the carrier where the means for mounting is protected by the cutting mechanism.

[c12] A lawn mower blade comprising:

- a) a carrier;
- b) a detachable cutting edge;
- c) an attachment mechanism that connects the cutting edge to the carrier where the attachment mechanism is accessible from the bottom of the carrier; and
- d) a slot safety mechanism
